NVF Curriculum Documentation

Whole school **Curriculum map** – what are we teaching and why?

- Read alongside the **Curriculum Intent and Priorisation** document

Long term planning – Year Group Overviews – what does each *year group* learn and therefore what does each *class* learn and cover in a mixed age rolling programme

Medium term planning – every subject and every year group – a quick reference document

Short Term planning – unit planning for every unit in every subject for every class; detail objectives for each year group, adaptations made for each group of learners with vulnerabilities, key knowledge and concepts that children must know and the links to the other subjects.

These are a significant undertaking, taking several hours each subject, but once done only need revisiting every few years in line with our rolling programme.

These documents enable PPA for teachers to become about quality interaction time discussing and sharing successful adaptations, resourcing, assessments – such as formative, summative and ipsative (self) assessment of all subjects (not just core subjects) and the wider curriculum (in time looking at children's personal development, spiritual growth etc)
